DETAILED ACTION

The Amendment, filed on February 24, 2003, has been entered and overcomes the rejection of claims 1-3,5, 6,14 under 35 U.S.C. § 102(b), and claims 4,7-13,15,16 under 35 U.S.C. § 103(a).

Drawings

The corrected or substitute drawings were received on February 24, 2003. These drawings are entered.

The drawing in Fig. 1 is objected to because the spacers positioning the heating conductor 4 should be labeled as 4c according to the disclosure in specification page 9 line 3.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 2879

Claims 1-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Referring to claim 1, the limitation reciting 'when seen in cross section, describes a closed line completely around a surface' is indefinite because it fails to particularly point out which cross section and surface are being referred to. Regarding cross section, the metallic reflector being a three dimensional body has different cross section in transverse and longitudinal directions. The cross section of the reflector is circular or in closed form, only in a direction transverse to the axis of the tube. Furthermore the closed line completely around a surface is vague and fails to distinctly claim the subject matter.

Claims 2-16 are rejected being dependent on the base claim 1.

Allowable Subject Matter

Claims 1-16 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

The following is a statement of reasons for the indication of allowable subject matter:

Regarding claim 1 the prior art of record neither shows nor suggests an infrared radiator with all the limitations as claimed, particularly the limitation comprising the metallic reflector having the reflecting surface completely lined around the channel transporting the liquid coolant.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
